NOTICE
From and after this date Collections for Subscriptions to the DAILY BRITISH COLONIST will be made MONTHLY.

Information Wanted.

The British Columbia Examiner calls upon the Governor to make public the state of the Capital question—to say whether or not any decision has been arrived at on the subject; and if so, which place, if either, has been selected as the future Seat of Government of the Colony? Our cotemporary argues that the excessive reticence observed by the Government indicates that a decision unfavorable to New Westminster has been come to; but, being fully prepared for the worst, he is willing to receive the unwelcome tidings without further delay. Our cotemporary is right. No good can be accomplished by pursuing the present reticent policy. The result is mischievous to New Westminster, where an unsettled and undecided state of public feeling exists to an extent that paralyzes every interest. As is natural, there are many rumors afloat as to the nature of the last despatches received by the Government; but the one which finds the most credence is that which has it that the next session of the Legislative Council will be held at Victoria. Admitting this to be correct, another question presents itself, viz: When will the Council be called together? There is no law that we know of that compels the Governor to summon the Council to meet at any stated time. He is not confined to dates. The matter is left discretionary with his Excellency. He may call the Council together this season or he may not; and the New Westminsterians who eagerly scan the Gazette each week, hoping through its columns to penetrate the thick veil of mystery that now enshrouds the movements of the Government on this question, or who almost daily perform weary pilgrimages to the Camp in the pursuit of knowledge under difficulties, may live many months before the unwelcome truth bursts upon them. In fact, some assert that the secret is locked securely in the Governor's breast, and that the key to the secret is lost! We have long entertained the same opinion as our cotemporary: that if the Governor had had any good news for New Westminster ears he would have made it public long since. Hence we rather applauded than condemned his Excellency's reticence. The article in the Examiner indicates a very unsatisfactory state of the public mind at New Westminster. Any person who will take the trouble to read it, will discover that: and such being the case, we claim that justice—we had almost said gratitude—towards those people demands that the truth—unwelcome though it may prove—be made known at once; that they are fighting shadows when they talk and act as though the removal of the Capital would deal the place a deathblow. New Westminster would actually profit by the transfer. At most she would miss the money that the few officials now spend there; and to compensate her for that loss the deranged public mind would soon become tranquilized, the Government would be cheaply administered from Victoria, and the money saved by the concentration of the public business devoted to the improvement of the whole Colony. Even the "Brighton road" to Burrard Inlet, in place of being as now in a state of impassibility, would come in for its share of improvement out of the economized funds. Therefore we say again, that we have no fears of the final result of this agitation, and for the sake of quieting the public mind at "the Capital," we join our cotemporary in asking the Government to make public the decision and give Westminster a chance to turn its attention to the development of the latent resources which exist so abundantly in its neighborhood, instead of, as now, seeking out a miserable existence from the scanty crumbs that fall from the gubernatorial table.

Fees of Office.
VICTORIA, B. C., Jan. 8, 1868.
EDITOR BRITISH COLONIST:—Tax-payers may have noticed in your paper of 25th November last, reported the decision of the Supreme Court: in two cases in which the Government sought to impose a charge of five per cent on taxes in arrears, in addition to the five per cent provided by law. The injustice of the practice will be still more apparent, when it is recollected that the Treasury has been closed against the public

during the past eight months. In official abstract of probable Revenue for 1867, I notice a rebate of taxation due by Vancouver Island, \$36,000—5 per cent on which would amount to \$1800. Clever rather, on the part of our paternal Government, to lock the Treasury door against Government creditors and by so doing to take occasion to charge the debtor an additional 5 per cent. Previous to taking legal action in the matter, I addressed a letter to the Governor, with full particulars, and six weeks afterwards received official reply "declining to interfere with the Sheriff in the performance of duties required of him by law." Judging by the past, either His Excellency's legal conceptions require brushing up, or his law-advisers are greatly to blame. Wrong on the capital question, as regards its legal aspect; wrong on the customs question, in countenancing the attempt to make the new law retrospective to the detriment of Victoria merchants only; wrong on the question of sheriff's fees and wrong at Cariboo. In addressing that letter, I indulged myself with the hope that the heavy cloud of bewilderment which hung over the executive legal mind in the north would have lightened as it proceeded south, within reach of Attorney Generals and law libraries, in which hope I was disappointed. Imagine for an instant the absurdity of supposing that an act passed in England in the reign of Queen Elizabeth, 200 years before the land we inhabit was known to exist, should impose a special tax against the people of this Colony!

While on this subject—Last session I asked for a return of fines and seizures in the Customs Department up to 1866, and how appropriated. The amount was short of \$14,000, and the appropriation, I believe, as stated in clause CLXXXIV of the Customs Consolidation Act, 1843, which reads as follows: "All penalties or forfeitures recovered in the Channel Islands or any of the British possessions abroad under this, or any act relating to the customs, shall be paid into the hands of the collector, or other proper officer of the port or place, where the same shall have been recovered, and shall be divided paid and applied as follows; that is to say, after deducting the charges of prosecution from the produce thereof one-third of the net produce shall be paid to or for the use of Her Majesty, one-third to the Governor or Commander-in-Chief of the Colony or plantation; and the other third part to the seizer informer and prosecutor, excepting such penalties and forfeitures as are from seizures made at sea by the commanders or officers of Her Majesty's ship-of-war, duly authorized to make seizures moiety of which first deducting the charges of prosecution from the gross produce, shall be paid as aforesaid, and to the use of Her Majesty, and the other moiety to the seizer informer or prosecutor, subject nevertheless to such distribution of the product of the seizures so made at sea, as well with regard to the moiety hereinbefore granted to Her Majesty, as with regard to the other moiety given to the seizer informer or prosecutor as Her Majesty shall think fit to direct, by Order in Council or by Proclamation."

Now, whether Customs officers should be paid wholly by fixed salaries, or partly by salaries and in part by fees, is a matter upon which two opinions might be fairly entertained; I offer none. But I contend that any person who shall read attentively the following clause of the Customs Amendment Act of 1857, will have a difficulty in understanding why 1/2 of these fines and seizures should be diverted from the Colonial Treasury to swell the salary of the Governor, already out of all proportion to the tax-paying capabilities of the struggling people in this overgrown Colony. The section reads as follows: "20 AND 21 VICTORIA, CAP. 62. Whereas doubts have arisen whether the several sections of 'The Customs Consolidation Act, 1853,' other than those containing particular provisions relating thereto as also, 'The Supplemental Customs Consolidation Act 1855,' are applicable to the British possessions abroad. Be it enacted that the said recited acts, and the several clauses therein, and in this Act contained shall, and the same are hereby declared, to extend to, and be of full force and effect in the several British possessions abroad, except where otherwise expressly provided for by the said Acts, or limited by express reference to the United Kingdom or the Channel Islands, and except also as to any such possession as shall by local Act or Ordinance have provided, or may hereafter with the sanction and approbation of Her Majesty and Her successors, make entire provision for the management and regulation of the Customs, Trade and Navigation of any such possession, or may in like manner express provisions in lieu or variation of any of the clauses of the said Act, for the purposes of such possession."

Now, in the first place, it may be argued that this Colony has, in accordance with the clause last quoted, made entire provision for the management and regulation of the Customs, etc., inasmuch as the revenue is collected without costing Her Majesty one shilling; and it would be unreasonable to suppose that Her Majesty would claim the disposal of a fund created and collected wholly at the cost of the Colony. And the question of a refund might be entertained. But suppose some technical loophole left through which the Government can ingeniously wriggle—such as the omission to quote the Act of '57 in the Ordinance of '57, &c. As a tax-payer I ask, why has entire provision in lieu or variation of clause CLXXXIV, for the benefit of the exhausted Colonial Exchequer, not been made. Seeing that it is a more matter of scrivenery and of form, the Government have had six years to do it in, and that the subject matter of the clause first quoted is clearly not included among the "particular provisions" alluded to in the latter act?

LEGH HARNETT, Esq.:
SIR,—WE, THE UNDERSIGNED, WOULD beg to hear the result of your late explorations in the interior of the Colony during the past summer, being assured you have collected a vast amount of information of deep importance to us all. In our opinion, your labors will meet an ample recognition amongst our citizens generally, and we have therefore much pleasure in giving you a public invitation to Lecture before leaving for California, at such time as may suit your convenience. We remain, dear Sir, Your obedient servants,
James Trimble, Mayor
W. F. Tolmie
Roderick Phylaxson
W. J. Macdonald
Robert Burnaby
George Parkes
J. W. Traill
J. F. McRicht
Lumley Franklin
Victoria, 10th December, 1867.

To His Worship the Mayor and others.
GENTLEMEN,—I very gladly accept your invitation to lay before the public the result of my travels before returning home. I have really gathered such surprising evidence of your material wealth, that I should almost hesitate to submit it to the world without endorsement here, lest I were accused of exaggeration. Thus, the action now taken will strengthen my hands in California immensely. I intended to give the first Lecture on Wednesday next, but I have been compelled to postpone it until FRIDAY night, 11th instant, and the concluding Lecture until the following Monday.
I remain, Gentlemen, yours gratefully,
LEGH HARNETT, Esq.
Victoria, 3d January, 1868.

FIRE AND MARINE RISKS.

METHOD OF BUSINESS:

FIRST—Low Charges.
SECOND—Prompt Payment of Losses.
THIRD—No Law Suits.
FOURTH—All disputes which may arise are to be settled
by arbitration.

West Indies.
New York, Dec. 23.—A Havana special gives advice from Hayti to the 20th. A battle had occurred between the Dominicans and the Baez revolutionists, in which the latter were victorious; Gen Palances, of the national army, was killed. Baez has enlarged his sphere of operations in consequence of this victory.
The Legislative Chambers of St Domingo have disapproved of the loan of ten millions francs recently negotiated in Paris.
It is reported from a high source that United States Consul Savage has received a telegram from the American Consul in Santiago de Cuba, which he telegraphed to Mr Seward, advising him to defer further proceedings in reference to the purchase of St Thomas. A later telegram states that well-informed persons at Santiago doubt the report.
Cabrilla pronounces in favor of Baez.
The new Captain General was given a magnificent reception by the foreign Consuls at Havana.
Advices from Venezuela to the 6th say the press is vehemently demanding an explanation from the Government concerning the arrest of three citizens for alleged political offences while the country is tranquil.
The Tribune's St Thomas letter says there have been five hundred shocks of earthquake felt there.
Hayti correspondence says Salnave has made a general indiscriminate conscription upon the streets, it is said for Cape Haytien. The Government is placed in the charge of Gen Ulysses Nengre, who rules with a despotic hand.

Mexico.
New York, Dec. 27.—Advices from the City of Mexico to the 19th, received via Havana, say that much misery exists throughout the Republic in consequence of the exhaustion and disorganization following the war. A general call is made upon the Government to take measures to prevent the increase of brigandage, to which many people are compelled to resort by hunger. Peace is reestablished at Tepic, and after many disturbances, tranquility has returned to different parts of the Republic.
Havana, Dec. 26.—The steamship Virginia brings important news from Sisal. The revolution in Yucatan is assuming large proportions. Santa Anna has been proclaimed Dictator by the revolutionists, and is expected hourly with men and a million of dollars. The port and town of Sisal is in the hands of the rebels, but the port is blockaded by two Mexican gunboats. A number of officers who formerly served under the Empire, have arrived at Sisal. The coast of Yucatan and the vicinity of Sisal is diligently watched to prevent the landing of troops coming from any foreign country to aid the rebellion. When the Virginia left Vera Cruz on the 20th, the Mexican steamer Tabasco was about to sail for Sisal with an expedition to restore authority.
Santa Anna is still in this city. Many ex-Imperialist officers have arrived, and all seem busily engaged.

THE FAMINE IN NORTHERN SWEDEN.
We find the following in the New York Tribune of November 29th: The famine in the northern part of Sweden—above lat 62, in a province called Norrland—has now reached its climax. The sufferings of its people, with their dwellings surrounded in midwinter, by snow from 10 to 20 feet deep, are so great, according to official reports, that immediate relief is needed to prevent the whole number of the sufferers—over 300,000 souls—dying from actual starvation. The harvests in Norrland have been a partial failure for the last five years; and, during all this time, the people have borne their misfortune with remarkable cheerfulness, and without asking for aid of any kind whatever; but this year's crop having been entirely destroyed by frost in a single night, these poor people are left without any means whatever to provide, even in the most distant manner, a livelihood for themselves and their families. For nearly a year they have subsisted on a "bark bread mixed with moss," and this nourishment—it can be so named—has so weakened their frames that many are unable to work, and are now brought down to despair and death, seeing that there is not the least hope of sustaining their lives and families, with a ten months' winter staring them in the face. The Swedish Government, seeing the extreme peril of these sufferers being entirely exterminated by starvation, has nearly emptied all its storehouses, and sent the grain in their own war vessels to Norrland, so as to be available for the sufferers before the complete freezing up of the Gulf of Bothnia; and all over Europe, principally in London and Hamburg, has the officially sanctioned appeal for aid met with a most cheerful and liberal response.
BEECHER says: "I have given thousands of dollars to people in distress, with the understanding that it was to be paid back; but I have never received but \$3 back, and that was from a black woman."

A LADY'S ENDORSEMENT.
Madame E —, the acknowledged leader of the most refined and fashionable society in the city of New York, speaks of MURRAY & LANMAN'S Florida Water in the following highly complimentary manner: "It has a fragrance as fresh as the odor from blooming flowers, and imparts to the bath a delightful buoyancy. I use it on the toilet table and the handkerchief, to the exclusion of all other perfumes." Buyers should always ask for the Florida Water prepared by Lanman & Kemp, New York.

HOLLOWAY'S PILLS.—Strong and Healthy.—Every wise man aims at attaining health at any price, but, unfortunately, rarely think about it till it is going or gone. Holloway's Pills now stand so very high in public estimation for purifying the blood and promoting the appetite and digestion, that it is unnecessary to do more than name them as the surest and safest means of retaining or regaining robust health and corresponding strength. They act as purifiers, tonics, alteratives, and aperients; and they exercise over every organ the most wholesome influence, by supplying it with the purest blood, and regulating the quality and quantity of every secretion. The most timid and delicate invalid will derive from Holloway's Pills vigor and comfort.

THE GRAND PROMOTERS OF HEALTH.
HOLLOWAY'S PILLS.
The grand secret of attaining happiness is to secure good health, without which life is stripped of its pleasure. The first irregularity of function should be checked and right by appropriate doses of these fine purifying Pills, which strengthen the system by thoroughly cleansing the blood, and removing the cause of disturbance. Disordered action, remove the cause of disturbance and restore its normal and natural power to every organ, without inconvenience, pain or any other derangement of the Bowels, Liver and Stomach.
This medicine is so well known in every part of the world, and the cures effected by its use are so wonderful as to astonish everyone. It is a pre-eminent remedy for all bilious and liver complaints and derangements of the stomach and bowels, is no longer a matter of dispute or doubt. In these diseases the beneficial effects of Holloway's valuable Pills are so permanent and extensive that the whole system is renovated, the organs of digestion strengthened, and full and easy assimilation promoted, so that both physical and moral energy are increased.
Determination of Blood to the Head.
This is generally occasioned by some irregularity of stomach and bowels, which, if not quickly attended to, frequently terminates fatally. A few doses of the Pills will never fail to give tone to the stomach, regulate the secretions, and purify the fluids. Veritable dimness of sight and other indications of approaching apoplexy, are curably dispelled by a course of this admirable medicine.
The Female's Best Friend.
For all debilitating disorders peculiar to the sex and in every emergency, from the life of women, youthful or aged, married or single, this will speedily remedy the blood, and give strength and energy. It will correct all functional derangements to which they are subject.
Scrofula and all Skin Diseases.
For all skin diseases, however inveterate, these medicines are a sovereign remedy. While the full act upon the blood, which they purify, the outward pores through the pores of the skin, and cleanse every structure, as water saturates the soil or salt penetrates meat. The whole physical system is thus rendered healthy, regular and robust.
Coughs, Colds and Asthma.
No medicine will cure colds of long duration or such as are settled upon the chest so quickly as these famous Pills. Even when the first stage of asthma has appeared these Pills may be relied on as a certain and never failing remedy, particularly if the Ointment be simultaneously well rubbed into the chest and throat night and morning.
Indigestion—Bilious Headache.
These complaints may sometimes be considered trifling until it should be borne in mind that the full act upon the blood, which they purify, the outward pores through the pores of the skin, and cleanse every structure, as water saturates the soil or salt penetrates meat. The whole physical system is thus rendered healthy, regular and robust.
